### ***Eligibility Criteria:***

**Gender**  
All

**Age**  
≥ 18 Years & ≤ 76 Years

**Healthy Volunteers**  
No

This clinical trial was done to study a new medicine called, “fenebrutinib”, for the treatment of patients with “lupus”. Researchers wanted to know if fenebrutinib was safe over a long-term period when given to patients with lupus. One hundred and sixty patients took part in this study at 49 study centers in 11 countries.
